

## Beam Plates:

While not explicitly covered by BPIR regulations, RSL has endeavored to make such information public to ensure confidence in products supplied to market.

### Product:

Name:	Beam Plates
Line:	Pipe clamp accessories
Product Identifier:	BPL...

### Description:

Beam plates are manufactured from grade Q235B steel (GB/T 3274-2017) with a galvanized finish appropriate for general outdoor or indoor use.

These plates are designed to be used in conjunction with beam strap and u-bolts to secure pipe to an I-Beam or similar.

Plates are 44-67mm wide (to angled plate) x 6mm thick and with 13 or 18mm holes to suit M12 or M16 u-bolts (please see spec sheets for specific sizes). They come in a range of sizes to suit pipe from 34 – 220 od pipe (25-200nb).

### Scope of use:

Beam plates are designed to be used indoors or outdoors. Suitable for use in residential and commercial applications.

The protective galvanized coating ensures an intended life span of 15+ years when installed correctly.

Suitable for use in low and medium environmental conditions.

### Conditions of use:

Must be installed in accordance with NZBC standards and RSL installation guide.
