

Galvanized U-Bolts:

While not explicitly covered by BPIR regulations, RSL has endeavored to make such information public to ensure confidence in products supplied to market.

Product:

Name:	U-Bolt
Line:	Pipe accessories
Product Identifier:	UB10-.../G, UB12-.../G, UB16-...

Description:

U-Bolts are manufactured from mild steel grade Q195 or higher to GB/T 701-2008 standards with a galvanized finish appropriate for indoor and outdoor use.

These bolts are designed to be used within various systems to support pipe.

Bolts are rolled thread rather than cut (please see spec sheets for specific sizes). They come in a range of sizes to suit pipe from 21 – 220mm outer diameter (15-200nb)

Scope of use:

U-Bolts are designed to be used indoors or outdoors. Suitable for use in residential and commercial applications.

The protective galvanized coating ensures an intended life span of 15+ years when installed correctly.

Suitable for use in low - medium environmental conditions.

Conditions of use:

Must be installed in accordance with NZBC standards and RSL installation guide.
